EXPERIENCE

SIGHTBOX INC
Portland, OR
August 2017 – present

ECP Specialist

- Coordinate with optometrists' offices to ensure members receive eye exams and contact lens fittings, including providing payment and clarifying Sightbox's services
- Perform intake on paperwork from optometrists, processing contact lens prescriptions and entering them for warehouse orders

SQUARESPACE INC
Portland, OR
October 2014 – April 2017

Customer Care Advisor

- Troubleshot and guided customers through website setup and design through both email and concurrent live chat channels
- Designed sites and acted as ambassador/facilitator in helping customers attain the design standard set by Squarespace
- Identified and communicated system-wide and site-specific issues to the developers and product solutions team

CAMERA BITS INC
Portland, OR
November 2012 – October 2014

Support and Production Coordinator

- Provided detailed technical support to users via phone, email, and social media regarding issues with software installation, licensing, usage, and performance
- Overhauled existing software tutorials by developing, writing, producing, and editing new tutorial videos addressing common user needs and issues
- Helped manage company and technical support social media feeds

PROJECTS

BONSAI RADIO (github, live site)

A personal project inspired by my fastidiousness about personal listening stats, Bonsai Radio is a web application which stitches together the Spotify and Last.fm APIs so users can manage their Spotify playlists based on their personal listening habits and history.

PANDA ZONE (github, live site)

My wife and I primarily communicate through cute animal videos, and since red pandas are her favorite, I built this simple Javascript/jQuery application to serve up random red panda videos using the YouTube API. On future builds I'd like to add a button for folks to send me red panda videos they enjoy; as much as I enjoy the research I'd be glad to crowdsource it.
