CAREER OBJECTIVE

I'm a creative and detail-oriented web developer looking to take the next step in my career with a challenging and rewarding position on a team dedicated to building user-friendly software and applications.

SKILLS

Proficient with Adobe CS, Microsoft Office, OSX, as well as web application development with JavaScript, jQuery, Node.js, AnularJs, Laravel, PHP, HTML, CSS3

Some Experience with React, Python, PostgresSQL

EDUCATION

ALCHEMY CODE LAB
Portland, OR
July –December 2018

BOOT CAMP I & II

Rigorous professional training focusing on clean code in front-end and back-end development, employing fundamental Javascript, HTML5/CSS, Git/GitHub, jQuery, PostgreSQL, Express, and Node and establishing a background in individual problem solving as well as developing applications as part of a team.

CHAPMAN UNIVERSITY
Orange, CA
2004 – 2008

BFA, FILM PRODUCTION

Graduated Magna Cum Laude

Recipient, Chapman Grant, Film and Television Scholarship

EXPERIENCE

PRECOA
Portland, OR
August 2017 - present

Web Application Developer

- Write application code in a variety of languages to deploy new features and improvements for in-house web-based applications for use by hundreds of employees nationwide
- Troubleshoot and resolve user-reported bugs, as well as identify pain points and optimization opportunities with team managers
- Work in an agile environment with developer and data teams to update in-house api and databases, recently enabling a company-wide pivot towards virtual marketing events and appointments

SIGHTBOX INC
Portland, OR
August 2017 – present

ECP Specialist

- Coordinate with optometrists' offices to ensure members receive eye exams and contact lens fittings, including providing payment and clarifying Sightbox's services
- Perform intake on paperwork from optometrists, processing contact lens prescriptions and entering them for warehouse orders

PROJECTS

BONSAI RADIO (github, live site)

A personal project inspired by my fastidiousness about personal listening stats, Bonsai Radio is a web application which stitches together the Spotify and Last.fm APIs so users can manage their Spotify playlists based on their personal listening habits and history.

TIME 'MATER (github, live site)

Mainly looking for an excuse to put my React knowledge to work, I set out to build a pomodoro timer. I find I'm more productive using the pomodoro technique, but most online timers are garish and covered in banner ads. With Time 'Mater, I wanted to make something clean, direct, and friendly.

EXTRACURRICULARS

Cat dad, former Portland comedy celebrity, guitarist, vinyl collector, and book glutton. Regular attendee of Portland JavaScript Admiders, PDX Women in Tech, Portland ReactJS meetups. Speaker at Portland JavaScript Admirers, monthly volunteer with Oregon Food Bank, foster parent for Oregon Humane Society. Eagle Scout.
